

U.S. Export Price Index MoM

Haawks ID: | Symbol: USDJPY | Importance: ** | Positive Deviation: bullish

Description:

Export price tracks price changes of U.S. export goods. The figure is used to determine whether a change in the headline Export figure is representative of an increase of goods sold to foreign nations or just an increase in the price of export goods. United States exports account for approximately a tenth of the nation's GDP. The headline figure is the percentage change in the index from either the previous month or year. A higher than expected number should be taken as positive to the USD, while a lower than expected number as negative.

Note:

The data below was calculated using historic news & tick data of 74 releases from 2017-01-12 to 2023-02-17.

It combines the data from releases with positive deviations and releases with negative deviations. For the releases with negative deviations, the pip movements were multiplied by -1 to conform with the data from positive deviations. If a higher deviation is bullish for the trading symbol, a positive number signifies movement in the expected direction and a negative number signifies movement in the opposite direction. If a higher deviation is bearish then the opposite is true.

Key:

Name	Meaning
Time Delta	The amount of time elapsed after the news release
Range	The range of the pip movements
Mean	The mean average of the pip movements for all releases for each trigger
Median	The median average of the pip movements of all releases for each trigger
Correlation 1 Score (c_1)	Percentage of how many times the asset moved in the expected direction
Correlation 2 Score (c_2)	Percentage of pips which moved in the expected direction vs. the opposite direction
Correlation 3 Score (c_3)	The mean average of the Correlation 1 & 2 scores

Trigger 1: +-0.1%

time_delta	range	mean	median	c_1	c_2	c_3
1s	(-15.1, 22.4)	0.5	-0.2	45.5	54.8	50.1
