## **U.S. Core PCE Price Index YoY**

Haawks ID: | Symbol: USDJPY | Importance: \*\* | Positive Deviation: bullish

## **Description:**

The Core PCE price Index is the less volatile measure of the PCE price index which excludes the more volatile and seasonal food and energy prices. The impact on the currency may go both ways, a rise in inflation may lead to a rise in interest rates and a rise in local currency, on the other hand, during recession, a rise in inflation may lead to a deepened recession and therefore a fall in local currency.

## Note:

The data below was calculated using historic news & tick data of 74 releases from 2017-01-30 to 2023-02-24.

It combines the data from releases with positive deviations and releases with negative deviations. For the releases with negative deviations, the pip movements were multiplied by -1 to conform with the data from positive deviations. If a higher deviation is bullish for the trading symbol, a positive number signifies movement in the expected direction and a negative number signifies movement in the opposite direction. If a higher deviation is bearish then the opposite is true.

## Key:

| Name                      | Meaning   |
|---------------------------|---|
| Time Delta                | The amount of time elapsed after the news release                                   |
| Range                     | The range of the pip movements  |
| Mean                      | The mean average of the pip movements for all releases for each trigger             |
| Median                    | The median average of the pip movements of all releases for each trigger            |
| Correlation 1 Score (c_1) | Percentage of how many times the asset moved in the expected direction              |
| Correlation 2 Score (c_2) | Percentage of pips which moved in the expected direction vs. the opposite direction |
| Correlation 3 Score (c_3) | The mean average of the Correlation 1 & 2 scores                                    |
