Norway Core Retail Sales MoM

Haawks ID: | Symbol: USDNOK | Importance: * | Positive Deviation: bearish

Description:

Retail sales data represents total consumer purchase from retail stores. It provides valuable information about consumer spending which makes up the consumption part of GDP. A higher than expected reading should be taken as positive/bullish for the NOK, while a lower than expected reading should be taken as negative/bearish for the NOK.

Note:

The data below was calculated using historic news & tick data of 73 releases from 2017-01-30 to 2023-01-27.

It combines the data from releases with positive deviations and releases with negative deviations. For the releases with negative deviations, the pip movements were multiplied by -1 to conform with the data from positive deviations. If a higher deviation is bullish for the trading symbol, a positive number signifies movement in the expected direction and a negative number signifies movement in the opposite direction. If a higher deviation is bearish then the opposite is true.

Key:

| Name | Meaning |
|---------------------------|---|
| Time Delta | The amount of time elapsed after the news release |
| Range | The range of the pip movements |
| Mean | The mean average of the pip movements for all releases for each trigger |
| Median | The median average of the pip movements of all releases for each trigger |
| Correlation 1 Score (c_1) | Percentage of how many times the asset moved in the expected direction |
| Correlation 2 Score (c_2) | Percentage of pips which moved in the expected direction vs. the opposite direction |
| Correlation 3 Score (c_3) | The mean average of the Correlation 1 & 2 scores |

Trigger 1: +-0.3%

| time_delta | range | mean | median | c_1 | c_2 | c_3 |
