Haawks ID: | Symbol: USDCAD | Importance: ** | Positive Deviation: bearish

Description:

The Consumer Price Index (CPI) measures the change in the price of goods and services from the perspective of the consumer excluding foos and energy, wom prices tend to be very volatile. It is a key way to measure changes in purchasing trends and inflation. The impact on the currency may go both ways, a rise in CPI may lead to a rise in interest rates and a rise in local currency, on the other hand, during recession, a rise in CPI may lead to a deepened recession and therefore a fall in local currency.

Note:

The data below was calculated using historic news & tick data of 74 releases from 2017-01-20 to 2023-02-21.

It combines the data from releases with positive deviations and releases with negative deviations. For the releases with negative deviations, the pip movements were multiplied by -1 to conform with the data from positive deviations. If a higher deviation is bullish for the trading symbol, a positive number signifies movement in the expected direction and a negative number signifies movement in the opposite direction. If a higher deviation is bearish then the opposite is true.
