Canada Employment Change

Haawks ID: 10290 | Symbol: USDCAD | Importance: *** | Positive Deviation: negative

Description:

Employment Change measures the change in the number of people employed. Job creation is an important indicator of consumer spending. A higher than expected reading should be taken as positive/bullish for the CAD, while a lower than expected reading should be taken as negative/bearish for the CAD.

Note:

The data below was calculated using historic news & tick data of 74 releases from 2017-01-06 to 2023-02-10.

It combines the data from releases with positive deviations and releases with negative deviations. For the releases with negative deviations, the pip movements were multiplied by -1 to conform with the data from positive deviations. If a higher deviation is bullish for the trading symbol, a positive number signifies movement in the expected direction and a negative number signifies movement in the opposite direction. If a higher deviation is bearish then the opposite is true.
