U.S. Cushing Crude Oil Inventories

Haawks ID: | Symbol: USDJPY | Importance: ** | Positive Deviation: bearish

Description:

Change in the number of barrels of crude oil held in storage at the Cushing, Oklahoma during the past week. Storage levels at Cushing are important because it serves as the delivery point for the U.S. crude oil benchmark, West Texas Intermediate.

Note:

The data below was calculated using historic news & tick data of 321 releases from 2017-01-05 to 2023-02-23.

It combines the data from releases with positive deviations and releases with negative deviations. For the releases with negative deviations, the pip movements were multiplied by -1 to conform with the data from positive deviations. If a higher deviation is bullish for the trading symbol, a positive number signifies movement in the expected direction and a negative number signifies movement in the opposite direction. If a higher deviation is bearish then the opposite is true.

Key:

Name	Meaning
Time Delta	The amount of time elapsed after the news release
Range	The range of the pip movements
Mean	The mean average of the pip movements for all releases for each trigger
Median	The median average of the pip movements of all releases for each trigger
Correlation 1 Score (c_1)	Percentage of how many times the asset moved in the expected direction
Correlation 2 Score (c_2)	Percentage of pips which moved in the expected direction vs. the opposite direction
Correlation 3 Score (c_3)	The mean average of the Correlation 1 & 2 scores

Trigger 1: +-0.2M
